New Features

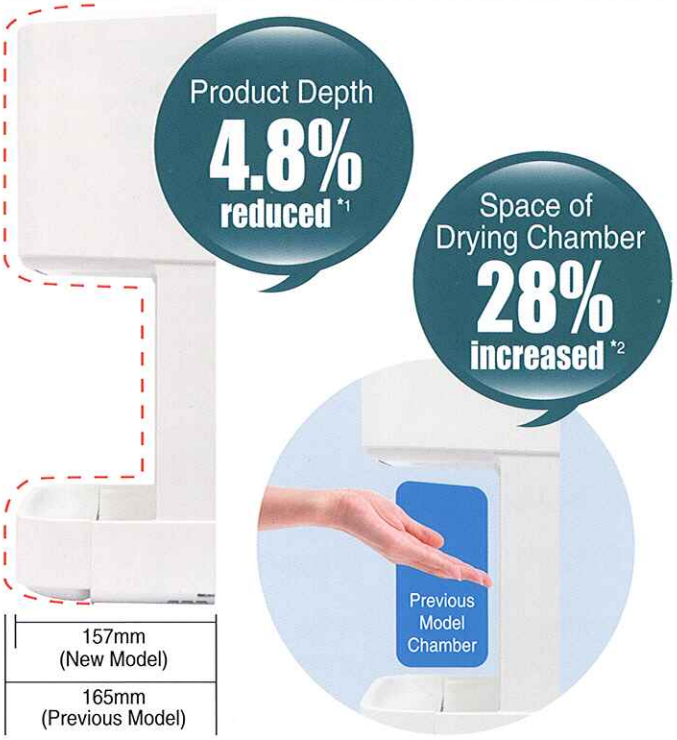

Compact Design

As compared with previous model, the depth of new model is 4.8% reduced. The slim shape allows the product to be installed in narrow space of washroom easily.

Spacious Drying Chamber

By adopting newly developed nozzle shape and compact-sized motor, the depth and height of hand drying chamber are increased about 28% in volume.

In addition, the shape of drying chamber is carefully designed that the possibility of touching the inner surface of drying chamber is minimized. It allows you to have a clean hand drying process always.
